

OWLS- Our Wise Learning Skills.

These are a set of carefully chosen skills and attitudes we want all our children to develop to help them to become responsible, confident lifelong learners.

Create-to bring something into existence.

Innovate- to change something or solve a problem by introducing new ideas and methods.

Question- to raise an issue that is in doubt or not certain.

Persevere- to continue to achieve your goal in a determined way, despite having problems to overcome.

Risk- to expose yourself to challenge and possible success or failure.

Resilient- to withstand making mistakes and recover from difficult situations.

Responsible- to have control over your own learning and an obligation to support the learning of others.

Teamwork- to co-operate and work jointly on an activity or project.

Communicate- to share and exchange learning, ideas, news and beliefs with others.

We will use our curriculum to provide opportunities for children to learn, practise and develop these skills and attitudes through challenge, enquiry based learning and activities which make them think!
